Forecast for Saturday 28 May 2022

Weather: A slightly chilly start to the day with a mixture of clear periods and scattered low cloud temporarily covering the highest summits. A dry and fine day follows with plenty of warm sunshine. Skies staying largely clear into the evening and night.

Chance of cloud-free hill tops above 600m: 70% at first, becoming 90% or greater by mid-morning.

Low cloud and visibility: Visibility is expected to be mostly good or excellent with distant hills clearly visible. Poor visibility is possible at first in any patchy low cloud with bases down to 400-500m, briefly obscuring nearby landmarks.

Meteorologist's View

An excellent day to be out on the hills. Make sure to protect your skin in the lengthy sunshine as UV levels are expected to be high.

Recent rainfall: measured at Neuadd: altitude 353m

14:00 on Fri 27 May 2022	3.6mm	3.8mm	10mm

Forecast for Sunday 29 May 2022

Weather: Largely clear skies through the early hours of Sunday but with the risk of some shallow mist and fog patches forming in valleys – these quick to clear as the sun rises. Cloud building through the morning, leading to some hazy sunshine but also the risk of occasional showers, perhaps heavy at times. The showers easing off into the evening with some clear periods developing.

Maximum wind: 10mph northeasterly winds on the summits.

Chance of cloud-free hill tops above 600m: 90% in the early hours and into the evening, falling to 70% during the day.

Low cloud and visibility: Cloud arriving through the morning will largely be above the summits but could occasionally drop to 400-500m, most likely in association with showers. This will temporarily obscure higher slopes, whilst any showers will also reduce visibility for a time. Before the showers begin and after they ease, very good visibility is expected.

Temperature: **Valleys:** Plus 6 Celsius, rising to plus 16 Celsius.
At 600m: Plus 3 Celsius, rising to plus 7 Celsius.
Freezing level: Above the summits.
